BREAKTHROUGH FOR CHRONIC FATIGUE SYNDROME, M.E. AND FIBROMYALGIA

HOW NEUROBIOLOGY AND EPIGENETICS POINT THE WAY TO RECOVERY

VOLUME 2
RECOVERY FROM
CHRONIC NEUROSOMATIC ILLNESS

Judith Maizels, PhD., MBHMA

with
Fiona Adamson
M.Litt., Adv. Dip. Psych., MBACP

Volume 2 Recovery from Chronic Neurosomatic Illness

Contents

(still subject to editorial review, 25/11/15)

Foreword by Ruth Sewell Acknowledgements Preface to Volumes 1 and 2

1. Introduction

Part 1

The Epigenetics Revolution:

Transformational Epigenetics and Recovery from CFS/ME and Fibromyalgia

- 2. Epigenetics and How We Build New Neural Networks: Why Full Recovery is Possible
- 3. Epigenetic Responses to Chronic Stress
- 4. Chronic Stress, Telomeres, and Disease
- 5. Transformational Epigenetics: Therapeutic Interventions for Epigenetic Recovery from Chronic Neurosomatic Illness
- 6. Transformational Epigenetics for Recovery from CFS/ME and Fibromyalgia
- 7. The Neurosomatic Model of CFS/ME and Fibromyalgia: A Summary of the Role of Neurobiology and Epigenetics in Illness and Recovery

Part 2A

The Neurosomatic Model of Recovery: How to Restore a Healthy Epigenetic Profile Using Neurosomatic Intelligence 1. Developing Conscious Awareness

- 8. Neurosomatic Intelligence: The Key to Recovery
- 9. Neurosomatic Intelligence and Developing Conscious Awareness
- 10. Learning about Bodymind Recall: Steps 1 and 2
- 11. Bodymind Recall and the Symptom Message: Steps 3 and 4
- 12. Reflection and Appraisal through Journal Writing
- 13. How Bodymind Focusing Alters Brain Activity and Reduces the Stress Response
- 14. Accordance of the NSRP with other Bodymind Focusing Approaches

Part 2B

2. Neurosomatic Intelligence and Taking Authentic Action

- 15. Taking Authentic Action: 1. What is Authentic Action?
- 16. Taking Authentic Action: 2. Conscious Reflection and Appraisal as the Basis for Taking Authentic Action
- 17. Taking Authentic Action: 3. The Neurological Basis for Taking Authentic Action and Sustaining Recovery
- 18. Taking Authentic Action: 4. Dealing with Fear, Shame, Guilt, and Anger
- 19. Recovery as Return from Exile: Being "Ready" to Return to One's True Self
- 20. Taking Authentic Action: 5. Transforming Fears into Positive Epigenetic Change

Part 3 The Neurosomatic Recovery Programme (NSRP)

- 21. The Core Meaning and Purpose of Chronic Neurosomatic Illness: As the Basis for Recovery
- 22. Contrasts in the Emotional Origins of CFS/ME versus Fibromyalgia?
- 23. The Neurosomatic Model as the Basis of the Recovery Programme
- 24. Introducing the Neurosomatic Recovery Programme (NSRP)
- 25. The Therapeutic Framework of the NSRP
- 26. How the NSRP Compares with Emotion-Based CBT for CFS/ME and Fibromyalgia
- 27. Positive Strategies for Recovery
- 28. Supporting Young People to Recover from CFS/ME

Conclusions: How the Neurosomatic Model Explains Epidemiological "Mysteries" and Challenges the Current Medical Paradigm

- 29. Epidemiological "Mysteries" about CFS/ME and Fibromyalgia: Some Neurosomatic Explanations
- 30. Epilogue: Why it's Time to Challenge the Current Medical Paradigm for CFS/ME and Fibromyalgia

Appendices

Appendix 1: Mechanisms of Epigenetic Change Regulating Gene Expression

Appendix 2: How Selective Epigenetic Changes Mediate the Impact of Early Life Stresses on Vulnerability to Illness: Full Legend to Figure 3.1
